Command Center — one map to every artefact

Nexford Adaptive Study Partner · Joel Willfors · AI Product Specialist assignment.

This single page is the reviewer's index. Every link below is absolute — the PDF version is designed to be sent standalone and still open every downstream doc directly on GitHub.

The two live pointers

Link	Purpose
Live prototype on Vercel	One Vercel deploy, live OpenAI + Supabase, seeded student (Sara Patel) on Business Fundamentals. Toggle **Student ↔ Teacher** from the top nav.
Source on GitHub	The 48-hour build. Next.js 16 · React 19 · Supabase · OpenAI function calling.

Reviewer read order

Document	When to open it	Time
`SUBMISSION.md`	Cover sheet — three artefacts + rubric crosswalk. Start here.	1 min
`PRODUCT_BRIEF_ONE_PAGER.md` · PDF	90-second CPO memo — persistence thesis, four cognitive functions, four decisions, four insights, Canvas-embed diagram.	2 min
`PRODUCT_BRIEF.md`	Long-form brief — six insights, honest gaps, Profiler eval (n=20), Day 1 if hired.	5 min
`HEADLESS_API.md`	HTTP + JSON contracts Canvas would consume. Same JSON, two clients.	3 min
`ROADMAP.md`	Shipped / next / explicit non-goals / Tier-3 Adaptive Meta-Agent.	2 min
`README.md`	Repo overview — code layout, local dev, env setup.	2 min

Deploy & operations

Document	Purpose
`DEPLOY.md`	Vercel deploy from scratch — `frontend/` as Root Directory, four env vars, smoke-test checklist.
Vercel project settings	Framework auto-detected from `frontend/package.json`; region + env vars live in Vercel Dashboard, not in a repo-level config file.

Smoke-test the live URL in 60 seconds

Open https://nexford-adaptive-study-partner.vercel.app/ and walk the demo spine:

1. **Landing** (`/`) — Sara Patel, 33% through Business Fundamentals, Continue-learning card.
2. **Learn** (`/learn/accrual_vs_cash`) — hover any sentence → *Explain this* → Socratic Mentor opens, streams a reply within ~6s.
3. **Journey** (`/journey`) — concept map of what Sara has mastered so far.
4. **Plan** (`/plan`) — Atlas's deterministic planner, week inside the 12–15h Success Band.
5. **Teacher** (top-nav role pill → Teacher → `/teacher/watchlist`) — Sara's row surfaces with the bottleneck.

If anything 500s, the Vercel function log will flag a missing `OPENAI_API_KEY` or `SUPABASE_SERVICE_ROLE_KEY`.

Regenerate this file's PDF from the repo root: `npm run build:command-center-pdf`. Regenerate the one-pager PDF: `npm run build:onepager-pdf`.
